

## **Request for Proposal**

### **Point-of-Entry (POE) Treatment System**

The Lempster School invites qualified and reputable companies to provide a proposal for the installation of POE treatment systems to our drinking water supply in Lempster, NH. We have one well with its own pump house before distribution, has been impacted by PFAS. Lempster School is requesting proposals that will include system design details for a POE treatment system to remediate PFAS to below 4 ng/L. Proposals should include cost for installation and one year of operation & maintenance. All work should be done after school hours, during vacations or during the summer. Additional project details can be provided by emailing [JLewis@SAU71.org](mailto:JLewis@SAU71.org). Proposals are due by April 15, 2025.
